

# ENHANCES DAILY DOCUMENTATION AND COMMUNICATION

## BENEFITS

**Solution of administrative tasks in the citizen's home**

**Easy to use**

**Common solution for authorities and providers**

**Continuous data access**

**VITAE Care Mobile Record is developed for employees with major documentation and registration needs who work at the citizen's home and thus require a mobile record.**

Using VITAE Care Mobile Record enables the individual employee to transfer selected modules from a citizen's record to a local database if access to the network is available, and use these record modules offline.

In this way the municipality's employees are able to solve multiple tasks and make the required documentation directly in the citizen's home. This saves office hours and thus allows more time to care.

VITAE Care Mobile Record works as a mobile version of VITAE Care Record containing its most important elements.

## **SOLUTION OF ADMINISTRATIVE TASKS IN THE CITIZEN'S HOME**

VITAE Care Mobile Record offers access to work offline with the following modules from the citizen's record:

- Citizen module
- Functional assessment
- Needs assessment module
- Documentation module

Thus the solution enables the user to make inquiries and register changes in the record, for example in connection with needs assessment in the citizen's home.

## **EASY TO USE**

VITAE Care Mobile Record has the same user interface as VITAE Care Record, which provides for an easy-to-use solution.

## **COMMON SOLUTION FOR AUTHORITIES AND PROVIDERS**

VITAE Care Mobile Record can be used by authorities as well as providers.

Employees can retrieve the necessary data where there is a natural need for it - at the citizen's home.

The employee can among other things register the citizen's needs, order help and document the tasks that have been solved.

## **CONTINUOUS DATA ACCESS**

Relevant data is available as an encrypted copy on the mobile devices, and whenever access to the network is possible, the employee can update with data from the record server.

VITAE Care Mobile Record is the solution for users with major registration requirements that are best met using laptops with decently sized screen and keyboard.

**CSC Scandihealth A/S**

CSC Scandihealth develops and supplies electronic health records and solutions for hospital information, clinical quality, care, health insurance, and student administration. We put our health professional knowledge and competence to work in support of the development of an integrated healthcare community.

We have supplied healthcare IT to Danish hospitals since 1972. We have created an unrivalled product range, a unique pool of know-how about the healthcare sector, and in-depth knowledge of the world of our customers.

Our employees are primarily working with the development and supply of healthcare IT. The knowledge and expertise of our employees encompass technology as well as healthcare, a combination that provides us with a sound basis for further development and delivery of healthcare IT solutions that allow our customers more time to concentrate on their own core services.

CSC Scandihealth is owned by CSC and is CSC's Nordic competence centre for healthcare solutions.
